

# X-FACTOR MILD

## USER GUIDE

A NEW GENERATION IN TIRE PREPS

### GENERAL INFORMATION

Used for mild to medium applications when bite and grip are needed. This version is the "medium" form best used for those mild situations and applications. Great for marginal tracks, light moisture or dry slick track conditions where moderate grip is needed. Can be used on all natural and synthetic tire compounds. X-Factor Mild is a safer alternative than other products in the market. X-Factor Tire Preps can be inter-mixed. **Non-Flammable & VOC Compliant**

### USE RECOMMENDATIONS

Will drop hardness of a tire 2-5 points depending on number of coats applied. X-Factor Mild is mainly used as an external prep although it can be used internally. Starting point for rolling outside - 2 to 4 oz for 6 to 8 hours. Applying outside or as a PRW - apply with light coats in order for product to dry and penetrate. General coat will drop hardness reading 1 to 2 points. Apply multiple coats to achieve desired hardness reading. The addition of heat will allow for faster penetration.

### PRODUCT SPECIFICS

- Use as an external prep
- Use as a pre-race wipe
- Can increase the life of a tire
- Will add extra bite and traction
- Can be used on all makes of tires synthetic and natural
- Can be inter-mixed with other X-Factor Tire Preps
